Έχουμε:

$$f(x+h) - f(x) = x + h - x = h$$

 Γ ια $h \neq 0$ ισχύει

$$\frac{f(x+h) - f(x)}{h} = \frac{h}{h} = 1$$

Οπότε:

$$\lim_{h \to 0} \frac{f(x+h) - f(x)}{h} = \lim_{h \to 0} 1 = 1$$

'A $\rho\alpha(x)'=1.$
